

Lisa F. Wilk, PE

Title President and CEO

Registrations Massachusetts Registered Professional Engineer

Education -B.S., Chemistry, Bates College
-B.S., Civil/Environmental Engineering, Northeastern University
-Numerous graduate courses in Environmental Engineering and other areas of continual professional development

Experience Ms. Wilk became Owner of the firm on June, 30, 2008, when original Owner, Robert Capaccio, retired. Wilk has been with the firm since its inception in 1992, and served as President prior to the ownership change.

As President and CEO, Ms. Wilk is responsible for overall operations, recruiting and retaining outstanding staff, and ensuring that our client's needs are proactively addressed in a cost-effective, value-added manner.

Ms. Wilk is also actively involved in the integration of best management practices into day-to-day operations through implementation of on-site Environmental, Health and Safety (EH&S) management assistance programs. She brings practical, experienced-based solutions from her direct experience working in the electronics, semiconductor, metal finishing, heat treating, photochemical machining, biotechnology and bioscience industries.

Staying current with global and local trends is key to proactively meeting the needs of our clients. Ms. Wilk has been active in helping our clients develop and implement systems for maintaining compliance with growing global product content restrictions, and addressing other demands from our client's stakeholders and their customers. Ms. Wilk is well-versed in recent European Union (EU) Restriction of Hazardous Substance (RoHS) and Waste Electrical and Electronic Equipment (WEEE) Directives, as well as similar legislation in other countries around the world. Ms. Wilk has also assisted corporations in preparing global sustainability metrics and reports.

Consistent with the firm's objective to effectively use technology, Ms. Wilk has directed the development of interactive computer-based EH&S training programs and applications of other computer and internet based technologies to help our clients meet their needs in a cost-effective and timely manner.

Publications Ms. Wilk is a published author of several technical articles and books on pollution prevention, and a frequent speaker at industry environmental seminars and conferences. Her recent presentations have focused on ISO 14001 and OHSAS 18001 implementation, sustainability, and measuring and reporting EH&S performance to all stakeholders in a global environment.
