

Universities, Colleges and Schools

Whether you're a large university, small school or private institution, CAPACCIO can deliver all of your engineering and environmental, health and safety needs. Since 1992, our experts have been working to deliver unparalleled expertise through a variety of services designed especially for this industry.

We serve our clients with a variety of services including health and safety program development, auditing, and compliance; preparation and submittal of environmental permits and registrations; wastewater (WWT) treatment design, compliance, permitting and training; above (AST) and underground storage tanks (UST) inspections; air source registrations and greenhouse gas services; spill, control, and countermeasures (SPCC) plans; stormwater management plans (SWMP); water pollution control systems; development and delivery of health and safety training services; hazardous waste management; and providing on-site EH&S professional staffing assistance.

Environmental, Health and Safety Compliance and on-Site Services

CAPACCIO provides EH&S compliance services on an individual or as needed basis or we can become part of your team under our Environmental Management on-site Program™. These services include:

- Compliance monitoring reports
- Contingency and emergency response plans
- Development of environmental management tools (e.g., environmental compliance calendar)
- EH&S auditing and compliance
- EH&S management programs and training
- EH&S live and computer-based training
- Emissions reports
- EPCRA and TURA reporting
- Hazardous waste generator training
- Health and safety compliance reviews
- Industrial hygiene sampling
- Industrial ventilation design and review
- ISO 14000 and OHSAS 18000 program development, implementation and integration
- Recycling program development
- Rideshare services
- SPCC plans and training
- SWMP planning, development and revisions
- Support for auditing programs
- Waste management
- WWT system operation, maintenance assistance and operator training

Sustainability Services

- GHG services
- Sustainability and corporate assessments
- Water reuse

Environmental Permitting

- Determinations for Lowest Achievable Emission Rate (LAER), Best Available Control Technology (BACT), and Reasonably Available Control Technology (RACT)
- Engineering certification of ASTs and USTs
- Flammable storage permits and licenses
- Permit application preparation for air pollution control systems, process ventilation, stormwater and wastewater
- Permit application preparation for water treatment, sewer, and wastewater treatment systems
- Permit applications for fuel burning equipment including emergency generators
- Permit application preparation for surface water discharges under the National Pollutant Discharge Elimination System (NPDES) program

Engineering Design and Construction Assistance

- Bid assistance
- Contaminated soil and groundwater management
- Design of air and wastewater pollution control/treatment systems
- Design of local exhaust ventilation
- Drawings and specifications
- Mercury removal
- Pilot testing
- Treatability and feasibility studies

Due Diligence

- Facility set-up and closure assistance
- Property transaction screening
- ASTM Phase I environmental assessments
- Groundwater investigations

QUALIFICATIONS

CAPACCIO professionals are:

- Certified Hazardous Materials Managers (CHMM)
- Certified Environmental, Health and Safety Trainers (CET)
- Certified Safety Professionals
- Certified Industrial Hygienists (CIH)
- Licensed Professional Engineers (PE)
- Licensed Site Professionals (LSP)
