

Hazardous Waste and Materials Management

Are you having trouble understanding the difference between a hazardous waste, hazardous material, hazardous chemical and a hazardous substance? Following all the regulations relating to this hazardous “stuff” can be confusing at best, but CAPACCIO'S Hazardous Waste and Materials Management Services can help put things into perspective.

Whether it's training, obtaining a permit, developing a contingency plan or a management program, CAPACCIO can define what your organization needs and offer the practical tools and experience to get the job done. Our professionals have worked in treatment, storage and disposal facilities as well as various industrial settings and understand the regulatory requirements and possess the experience to apply them.
