

Healthcare Services

Healthcare is one of the most highly regulated industries. To remain in compliance, a broad knowledge of environmental, health and safety regulations as well as an overall understanding of the codes that affect those in healthcare are paramount.

CAPACCIO has a knowledgeable staff of engineers, scientists, and regulatory specialists experienced in compliance, reporting, training, health and safety program development, life safety, infection control programs, environmental control equipment design and energy conservation consulting services to meet your needs.

BENEFITS

In order to control costs, healthcare facilities, as well as other industries, often out-source site related services such as security, cafeteria, housekeeping, and specialized physician services. Environmental, health, safety and code compliance services can also be out-sourced therefore providing your facility with the extensive expertise of an entire consulting firm while minimizing staff headcounts, cross-training and overwhelming workload assignments.

SERVICES

Life Safety

- Critical Systems Mapping (CAD)
- Fire and Smoke Barrier Inspections
- Interim Life Safety Measures Planning (ILSM)
- Life Safety and Joint Commission Compliance
- Life Safety Compliance Audits

Infection Control

- Bloodborne pathogens and exposure control programs
- Infection Control Risk Assessment (ICRA) program planning

Environmental Compliance and Engineering

- Compliance monitoring reports
- Contingency and emergency response plans
- DOT Training
- DOT registration (hazardous materials, hazardous waste)
- DOT site security plan
- EH&S compliance auditing

- Environmental management tools (e.g. environmental compliance calendar)
- Hazard communication
- Hazardous waste generator training
- Industrial hygiene sampling
- Indoor air quality assessments
- Laboratory safety
- Recycling program development
- Regulatory agency liaison
- Spill prevention, control and countermeasures (SPCC) plans
- Stormwater pollution prevention plans
- UST/AST Third Party Inspections
- Wastewater treatment system and operator training

Health and Safety

- Biomedical waste and sharps management
- Chemical and biological safety compliance
- Compressed gas handling
- Confined space entry program
- Electrical safety (NFPA 70e) Health and safety compliance
- Health and safety training
- Job hazard analysis
- Lockout/Tagout program
- Radiation and laser safety
- Medical surveillance programs
- Mercury management
- Personal protective equipment
- Respiratory protection

Environmental Permitting

- Air pollution control system permitting
- Determinations for Lowest Achievable Emissions Rate (LAER), Best Available Control Technology (BACT), and Reasonably Available Control Technologies (RACT)
- Fuel burning equipment permitting including boilers and emergency generators

- EPCRA Tier II
- Flammable storage permits and licenses
- Hazardous Waste Biennial Reporting
- National Pollutant Discharge Elimination System (NPDES) permitting
- Total Maximum Daily Load (TMDL) review
- UST/AST permitting and registration
- Wastewater user permits
- Wastewater sampling coordination service

Design and Construction Assistance

- Bid assistance
- Construction drawings and specifications
- Contaminated soil and groundwater management
- Design of air and wastewater pollution control treatment systems
- Laboratory ventilation design and review
- Resident inspection and system start-up
- Treatability and feasibility studies

Energy Efficiency

- Alternative energy solutions guidance
- Energy Audits
- Energy efficient equipment selection
- HVAC performance/efficiency studies

Site Selection

- Assessment of local regulations
- Development restriction review
- Identification of special local permit requirements
- Identification of surrounding land use such as residence and other sensitive users

Due Diligence

- ASTM Phase I environmental assessments
- Environmental auditing
- Property transaction screening
- Soil and groundwater investigations

293 Boston Post Road West

QUALIFICATIONS

Our engineers and scientists have hands-on experience and regulatory compliance backgrounds in environmental, health and safety management and code compliance in industries including healthcare facilities management. We understand the regulatory obstacles you face, and the day-to-day hurdles involved in making your organization successful.

CAPACCIO professionals are:

- Certified Industrial Hygienists (CIH)
- Certified RABQSA ISO 14001 Auditors
- Registered Professional Engineers (PE)
- Certified Hazardous Materials Managers (CHMM)
- Certified Environmental, Health & Safety Trainers
- Licensed Site Professionals (LSP)
- NFPA Members

CAPACCIO welcomes the opportunity to be a part of your team to help ensure your success. Let us show you how we can add value to your operations.
