

Global Electrical and Electronic Product Environmental Regulatory Tracking and Updates

CAPACCIO provides a customized electronic subscription service for global electronic product environmental regulatory law which includes information about the regulatory impact on the electronic industry.

Why do you Need Product Environmental Regulatory Tracking and Updates?

Organizations are tasked with trying to keep up-to-date with an ever-growing number of product related environmental laws and regulations. Our services can enhance an organization's operations by:

- Having a single information source
- Improving risk management process through data driven decision making
- Preventing regulatory incidents
- Sustaining investor and stockholder expectations
- Enhancing planning and integration of requirements into day-to-day operations
- Improving allocation of internal resources
- Providing uniform information for ease of understanding

Why Do You Need to Know the Impact of These Regulations?

- Reduces the time for risk management decision making
- Enhances management of internal resources
- Identifies the operations that need to be considered
- Provides infrastructure implementation advise

What Do You Receive?

A representative from CAPACCIO would work with you to identify your product environmental regulatory tracking and update needs. A subscription could include:

- Electronic regulatory summary
- Electronic multi-state regulatory comparison matrix
- Summary of the impacts of the regulation to your current operations
- Advise on infrastructure needs to integrate regulations into your current systems
- Recommendations for integration into current operations

Why Choose CAPACCIO?

Our personnel not only have expertise in environmental regulations, but also has in depth knowledge in electronics manufacturing and day-to-day operations, which gives us a solid understanding of the true business impact from a regulatory requirement.
